Formed in 1994, Housing Nantucket has created rental housing units and helped facilitate permanently affordable homeownership units. HN has also set a goal of creating 100 new units - through rental development, partnerships, and homeownership restriction - by 2015. Nantucket's housing crisis has been at an all time high for the last ten years - Housing Nantucket is trying to stem that tide.

In 2007, we made a commitment to creating all of our new units as "Affordable & Green." Simply put, this means that all new construction will meet at least the LEED for Homes certified standards. Housing Nantucket is committed to creating a Housing Resource Center which will educate the public about housing, construction, and green building. As part of that effort, HN has established a "Green Resource Library". Our library currently offers a variety of public resources on the basics and background of green building, different green rating systems, materials, the true cost of green, smart growth and housing, and affordable green building. Housing Nantucket's staff would be happy to lend from our library of books, magazines and brochures, show materials and to discuss low-cost options for building green. Our library is always growing, so stop in or call!

Books
